Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Ipiproteins from membranes...
In w. ABC transporter mediating the detachment of lipid-modified proteins from membranes. Such an Arp-dependent transport system responsible for the release of lipporceins targeted to the outer membrane for the inner membrane. Such a release is dependent of the sorting-signal (absence of an Asp at position 2 of the mature lipporcein) and of lola.
-!- SIBCELLULAR LOCATION: Inner membrane-associated.
-!- SIMILARITY: Belongs to the ABC transporter family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Oshima T., Aiba H., Baba T., Fujita K., Hayashi K., Honjo A.,

-!- FUNCTION: Part of the binding-protein-dependent transport system macNIQ for D-mathionine. Probably responsible for energy coupling to the transport system (By similarity).
-!- SUBCELLULAR LOCATION: Inner membrane-associated (Potential).
-!- SIMILARITY: Belongs to the ABC transporter family.
                                                                                                                                                                Gaps
